30x Full HD PTZ Camera with PoE
Model: AV-1562
20x Full HD PTZ Camera with PoE

User Manual

V1.0

**Please read this user manual
thoroughly before using.**

Preface

Thanks for using this HD Video Conferencing Camera.

This manual introduces the functions, installation process and operation of the HD camera. Prior to installation and usage, please read the manual thoroughly.

Precautions

This product should only be used under the specified conditions in order to avoid any damage to the camera:

- Do not subject the camera to rain or moisture.
- Do not remove the cover. Otherwise, you may risk receiving an electric shock. In case of unintended equipment operation, contact an authorized engineer.
- Never operate under unspecified temperature, humidity or power supply.
- Please use soft dry cloth to clean the camera. If the camera is very dirty, clean it with diluted neuter detergent; do not use any type of solvents, which may damage the surface.

Note:

This is a class A production. Electromagnetic radiation at certain frequencies may affect the image quality of TV in home environment.

Attentions

- **Electric Safety**

Installation and operation must accord with electric safety standard.

- **Use caution to transport**

Avoid stress, vibration or soakage in transport, storage and installation.

- **Polarity of power supply**

The power supply of this product is +12V, the max electrical current is 2A. Polarity of the power supply plug is shown in the drawing below.

- **Installation precautions**

Do not grasp the camera lens when carrying it. Do not touch camera lens by hand. Mechanical damage may result from doing so.

Do not use in corrosive liquid, gas or solid environment to avoid any cover (plastic material) damage.

Make sure there is no obstacle within rotation range.

Do not power on before installation is completed.

- **Do not dismantle the camera**

We are not responsible for any unauthorized modification or dismantling.

CAUTION!

Certain frequencies of electromagnetic field may affect the image of the camera!

Supplied Accessories

When unpacked, check if all supplied accessories are included:

Camera	1PCS
AC power adaptor	1PCS
Power cord	1PCS
RS232 cable	1PCS
Remote control.....	1PCS
User manual	1PCS

7	720P50	F	video format to be set from OSD menu

Note:

Please reboot the camera after switching the video format for changes to take effect.

Only when the dial is set at "F", video format can be changed from:

---webpage;

---remote control shortcut; (not all video formats are available)

---OSD menu;

Otherwise, video format can be changed from webpage and remote control shortcut. OSD menu won't show "video format" item.

2.4 Main Features

AV-1563/1562 camera features advanced ISP processing algorithms to provide vivid images with a strong sense of depth, high resolution and fantastic color rendition. It supports H.265/H.264 encoding which makes motion video fluent and clear even under less-than-ideal bandwidth conditions.

- **Full HD resolution:** 1/2.8-inch high-quality CMOS sensor. Resolution is up to 1920*1080 with a frame rate up to 60 fps.
- **30x/20x optical zoom lens:** with 65° (1563)/ 56° (1562) FOV without distortion.
- **Auto-focus technology:** fast, accurate and stable auto-focus technology.
- **Low noise and high SNR:** super high SNR achieved with low noise CMOS. Advanced 2D/3D noise reduction technology further reduces the noise while ensuring image clarity.
- **Multiple video output interface options:** HDMI, SDI, USB3.0, LAN. Simultaneously output video signal via HDMI, SDI, USB3.0 and LAN. LAN supports POE, USB3.0 support dual stream output, SDI output could be up to 1080P@60fps.
- **Multiple audio/video compression standards:** support H.264/H.265 video compression, up to 1920×1080 resolution @60 fps; support AAC, MP3 and G.711A audio compression, 8000,16000,32000,44100,48000 sampling frequency.
- **Built-in gravity sensor:** support PTZ auto-flip function and easy installation.
- **Multiple network protocols:** support ONVIF, GB/T28181, RTSP, RTMP protocols; support RTMP push mode, easy to be connected directly to streaming server (Wowza, FMS, etc.); support RTP multicast mode.
- **Control interface:** RS422 (compatible with RS485), RS232-IN, RS232-OUT for cascading.
- **Multiple control protocols:** support VISCA, PELCO-D, PELCO-P, VISCA over IP and ONVIF protocols.
- **Multiple presets:** up to 255 presets (10 presets using remote control).
- **IR/Wireless remote control:** users can choose IR remote control or wireless remote control via IP according to different applications.
- **Versatile for applications:** online-education, lecture capture, webcasting, video conferencing, tele-medicine, etc.

2.5 Specifications

Camera Parameter	
Optical Zoom	30X f4.3~129mm 20X f5.2-98mm
Sensor	1/2.8-inch high-quality HD CMOS sensor
Effective Pixels	16: 9, 2.07 megapixel
Video Format	HDMI/SDI/LAN video format 1080P60/50/30/25/59.94/59.97, 1080I60/50/59.94, 720P60/50/59.94/29.97 USB3.0 interface video format (up to 30fps) To USB3.0: YUY2/MJPEG/NV12/H.264/265: 1920*1080, 1280*720, 1024*576, 960*540, 800*448, 720*480, 640*360, 640*480, 320*176 To USB2.0: YUY2/NV12: 1024*576, 960*540, 800*448, 720*480, 640*360, 640*480, 320*176; MJPEG/H.264/H.265: 1920*1080, 1280*720, 1024*576, 960*540, 800*448, 720*480, 640*360, 640*480, 320*176
View Angle	30x: 65° (W) ~ 2.34°(T); 20x: 56° (W)~3.2° (T)
AV	30x: F1.6 ~ F4.7; 20x: F1.5~F3.0
Digital Zoom	10x
Min Illumination	0.5Lux (F1.8, AGC ON)

DNR	2D & 3D DNR
White Balance	Auto / Manual/ One Push/ Specify color temperature (range: 2400k-7100k)
Focus/Aperture/ Electronic Shutter	Auto/Manual/One Push Focus
Iris	Auto/Manual
Shutter	Auto/Manual
BLC	ON/OFF
WDR	OFF/ Dynamic level adjustment
Video Adjustment	Brightness, Color, Saturation, Contrast, Sharpness, B/W mode, Gamma curve
SNR	>50dB
Input/output Interface	
Video Output	HDMI, SDI, LAN, USB3.0
Video Stream	Dual stream output
Video Compression Format	LAN: H.265, H.264 USB3.0: YUY2, MJPEG, H.264, NV12, H.265
Audio Input Interface	Double track 3.5mm linear input
Audio Output Interface	HDMI, SDI, LAN
Audio Compression Format	AAC/MP3/G.711A
Control Interface	RS232-IN, RS232-OUT, RS422
Control Protocol	VISCA/Pelco-D/Pelco-P, Baud Rate: 115200/38400/9600/4800/2400bps
Power Interface	HEC3800 outlet (DC12V)
Input Voltage	DC12V±10%
Input Electric Current	Maximum: 1A
Power Consumption	Maximum: 12W
Network Protocols	RTSP, RTMP, ONVIF, GB/T28181; Network VISCA control protocol (VISCA over IP);
USB Communication	UVC (Video)
PTZ Parameter	
Pan/Tilt Rotation	±170°, -30°~+90°
Pan Control Speed	0.1 - 100°/sec
Tilt Control Speed	0.1- 45°/sec
Preset Speed	Pan: 100°/sec, Tilt: 45°/sec
Preset Number	255 presets (10 presets via remote control)
Other Parameter	
Stored Temperature	-10°C~+70°C
Storage Humidity	20%~95%
Working Temperature	-10°C~+50°C
Working Humidity	20%~80%
Dimension	7.1*4.5*5.9inch (181*115*149mm)
Weight	2.5lbs (1.15kg)

3. Remote Control

3.1 Functions for IR Remote Control

- 1). In this manual, “press the key” means a short press rather than a long-press and hold. A note will be given if a long-press for more than one second is required.
- 2). When a key-combination is required, do it in sequence. For example **【*】 + 【#】 + 【F1】** means press **【*】** first and then press **【#】** and lastly press **【F1】** .

1. Standby Button

Press this button and hold it for 3 secs to enter standby mode. The camera will do self-testing and return back to **【HOME】** position. (Note: If Preset 0 is set, and with no operation for 12s, the camera will automatically turn to Preset position 0.

2. Camera Address Selection

Press the camera address number to control the particular camera with the address setting.

3. Number Keys

To set or call 0-9 presets.

4. *, #, Key Combination

To use as combination with **【F1-F4】** to set camera address.

【*】 + 【#】 + 【F1】 : Camera Address No.1

【*】 + 【#】 + 【F2】 : Camera Address No. 2

【*】 + 【#】 + 【F3】 : Camera Address No. 3

【*】 + 【#】 + 【F4】 : Camera Address No. 4

5. Focus Control

【AUTO】 : to enter auto focus mode.

【MANUAL】 : to enter manual focus mode.

Switch the camera focus mode to manual by pressing FOCUS **【+】** or FOCUS **【-】** to adjust.

6. Zoom Control

ZOOM **【+】** : Lens near; ZOOM **【-】** : Lens far

7. Set/ Clear Presets

【SET PRESET】 + 【0-9】 number key: To set presets

【CLEAR PRESET】 + 【0-9】 number key: To clear presets

8. Pan-Tilt Control Buttons

Press the **▲**Up, **▼**down, **◀**left and **▶**right buttons to adjust the camera position. Press **【HOME】** to return to the center position.

9. BLC Control

【BLC ON/OFF】 : To turn on/off the back light.

10. Menu Settings

【MENU】 : to open/ close the OSD menu; to enter/ exit the OSD menu, or to return to the previous submenu.

11. Key Combination Functions

- 1) **【#】 + 【#】 + 【#】** : Clear all presets
- 2) **【*】 + 【#】 + 【6】** : Restore factory defaults
- 3) **【*】 + 【#】 + 【9】** : Flip switch
- 4) **【*】 + 【#】 + 【AUTO】** : Enter the auto mode
- 5) **【*】 + 【#】 + 【3】** : Set language to Chinese
- 6) **【*】 + 【#】 + 【4】** : Set language to English
- 7) **【*】 + 【#】 + 【MANUAL】** : Restore the default user name, PSW and IP address
- 8) **【#】 + 【#】 + 【0】** : Switch the video format to 1080P60
- 9) **【#】 + 【#】 + 【1】** : Switch the video format to 1080P50
- 10) **【#】 + 【#】 + 【2】** : Switch the video format to 1080I60
- 11) **【#】 + 【#】 + 【3】** : Switch the video format to 1080I50
- 12) **【#】 + 【#】 + 【4】** : Switch the video format to 720P60
- 13) **【#】 + 【#】 + 【5】** : Switch the video format to 720P50
- 14) **【#】 + 【#】 + 【6】** : Switch the video format to 1080P30
- 15) **【#】 + 【#】 + 【7】** : Switch the video format to 1080P25
- 16) **【#】 + 【#】 + 【8】** : Switch the video format to 720P30
- 17) **【#】 + 【#】 + 【9】** : Switch the video format to 720P25

3.2 Camera Menu

1. Menu Options

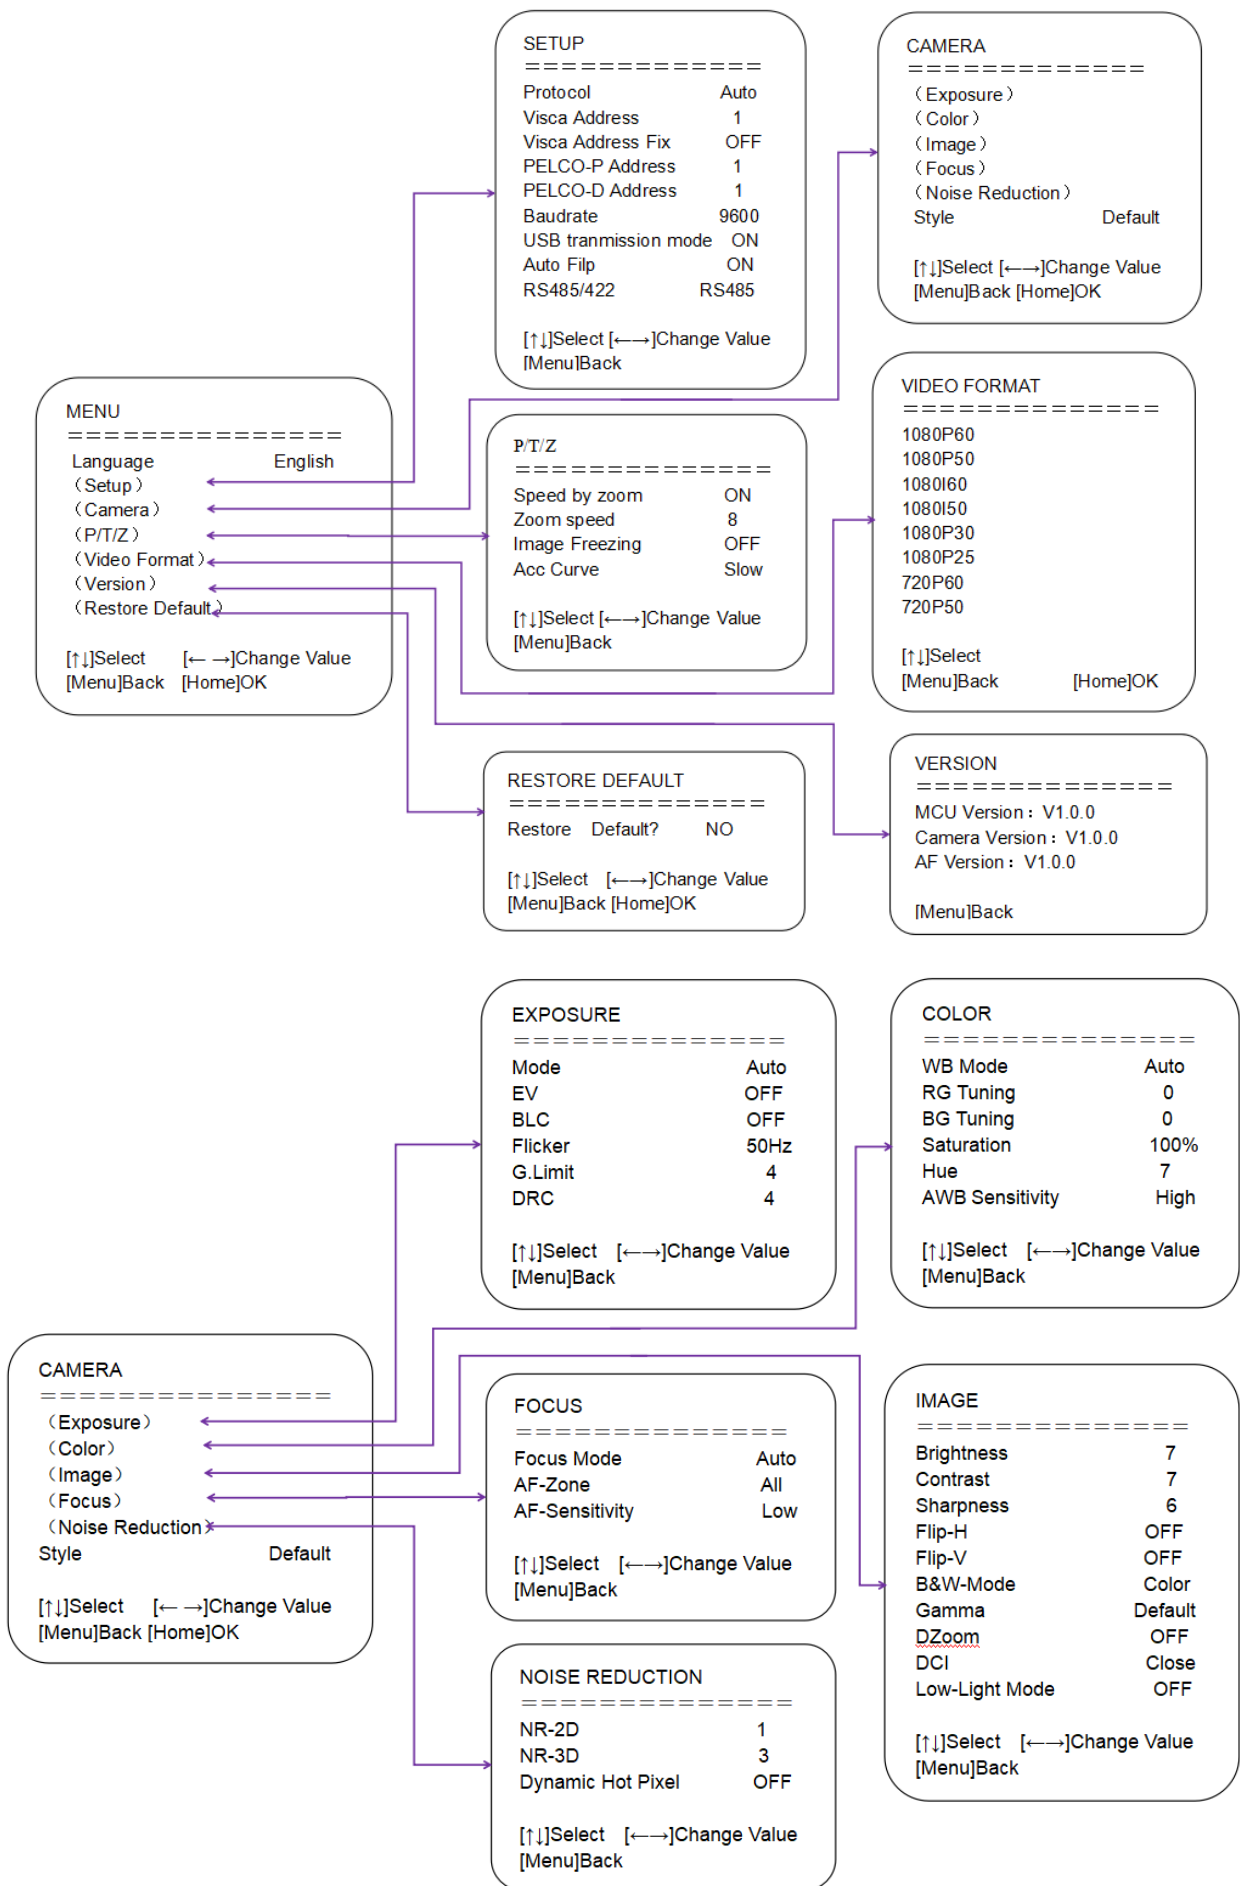

【MENU】 : Enter /exit the OSD menu or return to the previous sub-menu

【HOME】 : Enter the sub-menu

【↑】 【↓】 : Choose item

【←】 【→】 : Modify values

2. Menu Structure

4. Network Configuration

4.1 Network Connection

Direct connection: Connect the camera and computer via an Ethernet cable directly.

Internet connection mode: Connect the camera to Internet (via a Router or a Switch).

The computer must be assigned to the network segment where the camera IP address belongs to. The device will not be accessible otherwise.

The camera's default IP address is 192.168.5.163, and in this case, your computer's IP must be 192.168.5.xxx.

Open "Network and Sharing Center", select "Ethernet", "Ethernet Status", "Properties". Double click "Internet protocol version 4 (TCP/IPv4)". In the TCP/IPv4 Properties window; select "Advanced" to access TCP/IP settings. Set computer's IP, subnet mask and default gateway accordingly. Click the "Confirm" to finish the adding of IP segment. If you're using a camera with default settings, the recommended settings for your computer is:

IP: 192.168.5.160
Subnet mask: 255.255.255.0
Default gateway: 192.168.5.1

Note: please make sure the IP address to be added is not the same as any other device connected to your computer.

To verify the network segment has been successfully added, click "Search" icon and input "cmd". Then click "Command Prompt" and open DOS command window. Ping 192.168.5.26 and press Enter key to display information as shown below:

```
C:\Users\qq214>ping 192.168.5.26

Pinging 192.168.5.26 with 32 bytes of data:

Reply from 192.168.5.26: bytes=32 time<1ms TTL=128

Ping statistics for 192.168.5.26:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 0ms, Maximum = 1ms, Average = 0ms

C:\Users\qq214>
```

Connect the camera to your computer, power on. Open DOS command window, and ping 192.168.5.163, then press Enter key.

```
C:\Users\qq214>ping 192.168.5.163

Pinging 192.168.5.163 with 32 bytes of data:
Reply from 192.168.5.163: bytes=32 time=2ms TTL=64
Reply from 192.168.5.163: bytes=32 time=1ms TTL=64
Reply from 192.168.5.163: bytes=32 time<1ms TTL=64
Reply from 192.168.5.163: bytes=32 time=4ms TTL=64

Ping statistics for 192.168.5.163:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 0ms, Maximum = 4ms, Average = 1ms

C:\Users\qq214>_
```

4.2 IE Login

1) Web Page Login

Input the default IP address 192.168.5.163 in the browser and click Enter. User can login as administrator or as normal user. If login as administrator (Default User name/Password: admin), users can preview, playback, and set configuration; If login in as normal user (Default User name/Password:user1 or user2), users can only preview, playback, camera configurations cannot be changed.

Note: Web access support IE and Chrome browsers.

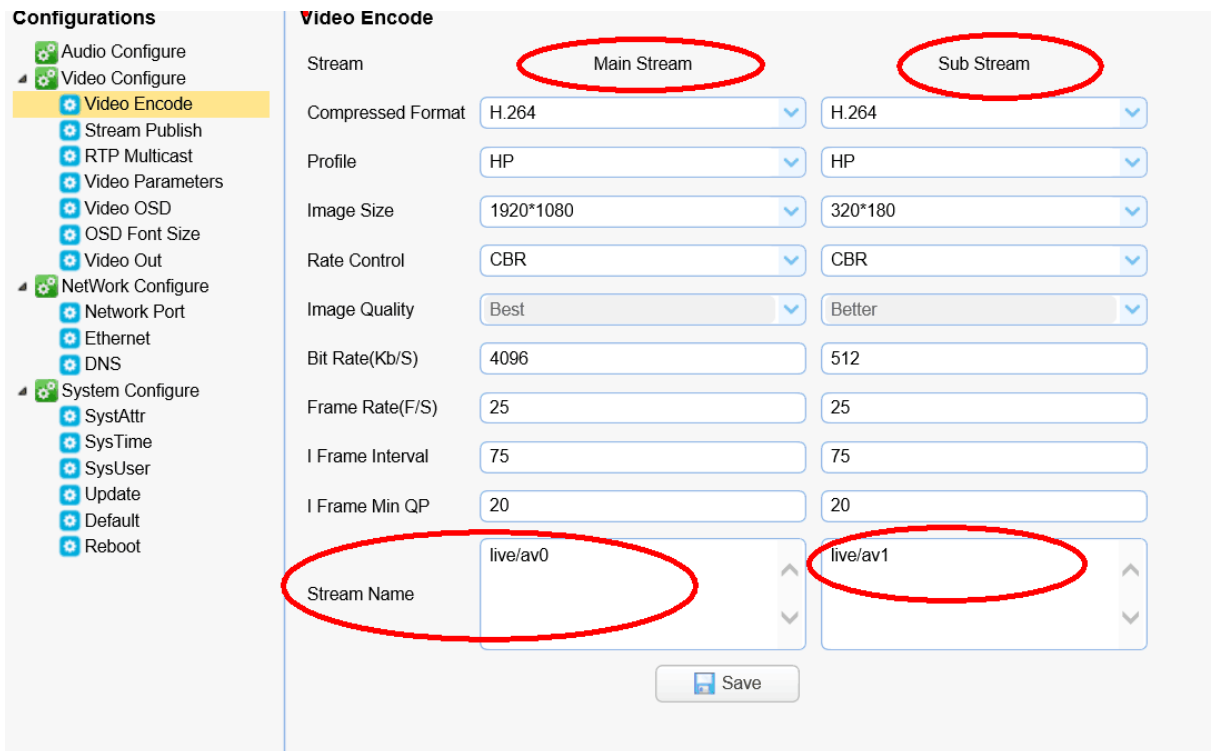

2) Download and Install Plug in for IE login

First-time login: a pop-up message will show on the bottom of IE browser: "Playback plug-in is not installed, please download and install!". Click on this message, download and install MRWebXinstall.exe following the information.

4.3 Video Encode

1). Video Stream Capture

Configurations -> Video Configure-> Video Encode

Configure the parameters according to the network settings.

Note: stream name live/av0 (live/ XXX)

For example:

The default IP address of the camera is 192.168.5.163. To obtain video via RTSP stream, please use the URL below:

rtsp://192.168.5.163/live/av0 (av0 main stream)

rtsp://192.168.5.163/live/av1 (av1 sub stream)

2). Push Video Stream

Configurations -> Video Configure-> Stream Publish

Configurations	Stream Publish	
	Main Stream	Sub Stream
<ul style="list-style-type: none"> Local Configure Audio Configure Video Configure <ul style="list-style-type: none"> Video Encode Stream Publish Video Parameters Video OSD OSD Font Size Video Out NetWork Configure <ul style="list-style-type: none"> Network Port Ethernet DNS GB28181 System Configure <ul style="list-style-type: none"> SystAttr SysTime SysUser Update Default Reboot 	<p>Stream</p> <p>Enable <input type="checkbox"/></p> <p>Protol Type <input type="text" value="RTMP"/></p> <p>Host Address <input type="text" value="192.168.5.11"/></p> <p>Host Port <input type="text" value="1935"/></p> <p>Stream Name <input type="text" value="live/av0"/></p> <p>User Name <input type="text"/></p> <p>Password <input type="text"/></p>	<p>Sub Stream</p> <p>Enable <input type="checkbox"/></p> <p>Protol Type <input type="text" value="RTMP"/></p> <p>Host Address <input type="text" value="192.168.5.11"/></p> <p>Host Port <input type="text" value="1935"/></p> <p>Stream Name <input type="text" value="live/av1"/></p> <p>User Name <input type="text" value="1"/></p> <p>Password <input type="text"/></p> <p style="text-align: center;"><input type="button" value="Save"/></p>

To push RTMP stream to a server/ platform (public network), make sure the camera's IP configurations are set to be consistent with the public network, otherwise it will not connect to server successfully. For connection details, please refer to: avipas.com-> SUPPORT -> HOW TO MATERIALS -> How to live stream.

Host address: server address. Can be a domain name or an IP address

Host port: server default port number

Stream name: live/test (live/ XXX)

Username and password: you will find the username and password on your server, otherwise leave it empty

Access URL : rtmp://host domain name: host port/live/xxx

Or (rtmp://host IP address: host port/live/xxx)

4.4 Software Upgrade

- 1). Log in to the web page to access camera settings.
- 2). Go to "Configurations" tab -> System Configure-> Update

3). Click "Browse..." to select the ".mrg" update file, then click upgrade button to start the upgrading process.

4). A "successful upgrade" message will prompt, and camera will reboot after completion of update.

Re-log in to check the firmware version to make sure software upgrade is successful.

Click "Reboot" -> "restore factory default" to restore camera to factory default and reboot. (default IP 192.168.5.163, user name: admin; password admin).

5. Serial Port Communication and Control

AV-1563 could be controlled through RS232/RS485 interface; RS232C serial parameters are as below:

Baud rate: 2400/4800/9600/115200 bits / sec; Start bit: 1; data bits: 8; Stop bit: 1; Parity: None.

5.1 VISCA Protocol Return Command

Ack/Completion Message		
	Command packet	Note
ACK	z0 41 FF	Returned when the command is accepted.
Completion	z0 51 FF	Returned when the command has been executed.

z = camera address + 8

Error Messages		
	Command packet	Note
Syntax Error	z0 60 02 FF	Returned when the command format is different or when a command with illegal command parameters is accepted
Command Not Executable	z0 61 41 FF	Returned when a command cannot be executed due to current conditions. For example, when commands controlling the focus manually are received during

		auto focus.

6. Maintenance and Troubleshooting

6.1 Maintenance

- 1) Please power off the camera and disconnect the power adapter from socket, whenever the camera is not in use.
- 2) Use soft cloth or tissue to clean the camera cover. Wipe it with a soft, dry cloth when cleaning the camera lens. Wipe it gently with a mild detergent if needed. Do not use strong or corrosive detergents to avoid scratching the lens and affecting the video quality.

6.2 Troubleshooting

1) No video output

- a. Check the camera power supply, make sure it is connected and the power indicator on the camera is solid green.
- b. Check if the camera can perform self-check (move the lens for the entire range) when powered on.
- c. Check the video select rotate dial, make sure the video output cable or video display is compatible.

2) No image

Check the video format (system select rotate dial on the rear panel), make sure its format is compatible with your monitor/switcher.

3) Video dithering when zoom-in or out

Check the camera installation, make sure the support is solid and still.

4) Remote control does not work

- a. Remote control address is set to 1 (if the machine is set back to the factory defaults, remote control addresses need to be back to 1 too)
- b. Check the battery, make sure it has enough capacity.
- c. Check the menu setting. Camera control via remote controller is only available after exiting the menu. If video outputs via LAN, menu will not be displayed. Camera menu will automatically close 30sec.

5) Serial port does not work

- a. Check the camera serial device protocol, baud rate and address (camera ID), make sure they're consistent with controller's settings.
- b. Check the serial cable, make sure it is connected properly.

6) Web pages cannot log in

- a. Check whether the network cable is connected properly (Ethernet port indicator light should be flashing yellow). First-time use, please connect the camera directly to your PC.
- b. Check if the computer is set to the network segment that is consistent with the IP address of the camera. For details, please refer to: avipas.com-> SUPPORT -> HOW TO MATERIALS -> Access camera via IP.

Warranty

Thank you for your interest in the products of AVIPAS Inc.

This Limited Warranty applies to HD Conference Camera purchased from AVIPAS Inc.

This Limited Warranty covers any defect in material and workmanship under normal use within the Warranty Period. AVIPAS Inc. will repair or replace the qualified products at no charge.

AVIPAS Inc. provides a one (1)-year warranty (from the date of purchase) for this HD Conference Camera.

This Limited Warranty does not cover problems including but not limited to: improper handling, malfunction or damage not resulting from defects in material.

To receive warranty service, please contact AVIPAS Inc. first. We will decide whether a repair or replacement is needed and will advise you of the cost of such repair or replacement.
